शुभकामनाएं

World Bartender Day

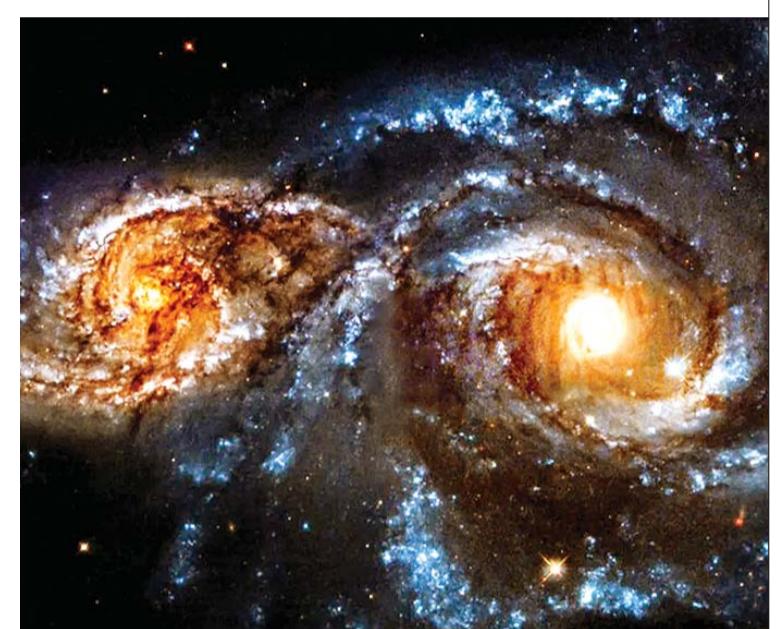

The bartender might be just about everyone's favourite person on a night out! Bartenders are able to keep people well supplied with tasty beverages, most likely those of an alcoholic variety, at any bar or pub they happen to visit, as long as they have enough money to pay for it and aren't too drunk to be served! More than just serving drinks, though, bartenders often offer a listening ear, a bit of information, or even some advice. Some people even consider a bartender to be their unofficial therapist. It's time to celebrate those men and women who work behind the bar on World Bartender Day!

Visitors From Another Star System May Have Infiltrated Our Galactic Neighbourhood

Sure, they're particles and rocks, but they're still a fascinatingly long way from home.

While interstellar objects have passed through our Solar System before, the origins of many of these objects remain unknown. Did they originate in a nearby star system? A distant one? A completely different galaxy?

The closest stellar system to us is the triple system Alpha Centauri. It's currently creeping closer to our Solar System at 79,000 kms per hour (about 49,709 mph), and should be at its closest around 27,700 years from now. With that in mind, researchers, Cole Gregg and Paul Wiegert from the University of Western Ontario, decided to see how many Alpha Centauri objects might have made it to us already, and how many could eventually make it here in the future.

"A small number (less than 10 meteors) may currently be entering Earth's atmosphere every year," Gregg and Wiegert said in a study, "and is expected to increase as Alpha Centauri 'approaches'."

Alpha Centauri is a meteor star system, which is 5 billion years old. This means that most of the material in this system's protoplanetary disk has likely already dissipated, so it is not expected to release much debris out into space (though, there might be material from the system in our asteroid belt and our distant Oort cloud). That said, the gravitational forces of more stars and planets make it more likely for material to scatter, and there may be planets orbiting its three stars (though, none have yet been confirmed).

To find out if Alpha Centauri could be currently ejecting material, the researchers turned to existing models of how star systems usually eject debris. The models predicted that, despite the small number of objects from Alpha Centauri that are expected to make it all the way to Earth every year, there could be as many as a million over-one-hundred-meter-in-diameter-sized objects from

"A thorough understanding of the mechanisms by which material could be transferred from Alpha Centauri to the Solar System not only deepens our knowledge of interstellar transport," the researchers say, "but also opens new pathways for exploring the interconnectedness of stellar systems and the potential for material exchange across the galaxy."

An Indian Half-Caste

Justice Carter specifically quoted a paragraph from Dover's *Half-Caste* that spoke elegantly of human evolution. In the book, Dover wrote that humankind's Neanderthal ancestors could have possibly arisen from a 'mixture between ape-men of the Ice Age.' Or its Neolithic forebears could have emerged from relations between Neanderthals and Aurignacian invaders of Europe. This means that miscegenation had influenced human evolution from the earliest times. "There has not been a pure race of our species for at least ten thousand years," Dover said.

● Kadambini Sinha

In 1948, a case came up for hearing in the California Supreme Court that challenged one of the very bases of racial segregation. The case was of Andrea Perez, a Mexican-American woman, who was legally considered white because of her Spanish heritage, had been denied the right to marry Sylvester Davis, an African American, because of California's anti-miscegenation law. An indigenous Perez petitioned the supreme court, demanding a marriage licence. The court agreed. It struck down the miscegenation law as unconstitutional by a verdict of four to three. Justice Jesse Carter, one of the judges in the majority, wrote a 3,665-word judgement explaining the decision, in which he chose to cite a book written by Cedric Dover, an Anglo-Indian, born nearly 8,000 miles away in Calcutta.

That said, the presence of these objects is not certain. There is also the issue of smaller particles from Alpha Centauri potentially not surviving the journey to the Solar System. They could be deflected by the Sun's gravity, slow down significantly due to drag in the interstellar medium, or end up decimated by extremely fast gas atoms or collisions with each other.

For any particles that do survive and manage to enter the inner Solar System, the Sun's gravity will increase their velocity significantly. Even more particles could come from hypothetical comets, at least, they could if Alpha Centauri ejects as many as our Solar System, but these are unlikely to be observed. Whether these potential particles are actually detectable remains to be seen.

"A thorough understanding of the mechanisms by which material could be transferred from Alpha Centauri to the Solar System not only deepens our knowledge of interstellar transport," the researchers say, "but also opens new pathways for exploring the interconnectedness of stellar systems and the potential for material exchange across the galaxy."

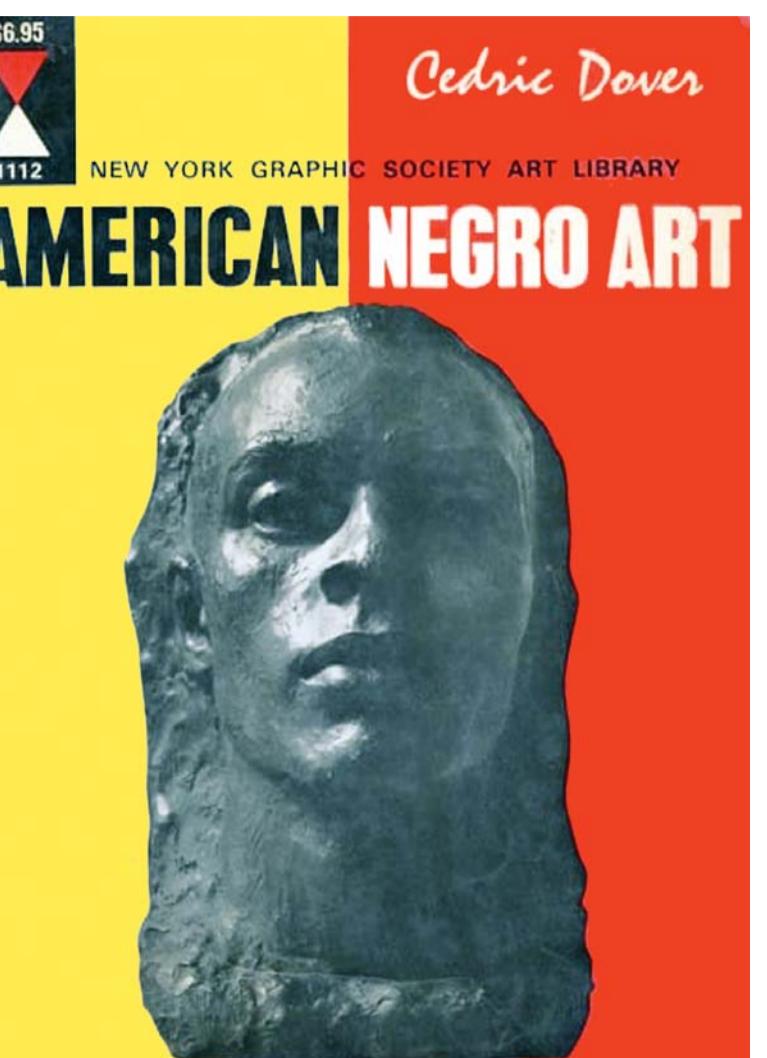

Cedric Dover.

racial equality will do no more than promote adjustments here and there."

One possible reason that Dover was attracted to issues of identity, community and belonging was his own background. He was born in the Anglo-Indian family of a father whose community was derided by others. Perhaps, spurred by this prejudice, he became an activist in the cause of people of colour (the 'mixed races' in his parlance), who, to him, were the prime movers of culture and societal evolution, and yet were denied their rightful place in history.

Dover's work on mixed races,

the 'Half-Castes' of his eponymous book, was at the time. Though an entomologist by training, his discovery of a mosquito repellent helped Allied soldiers during WWI. Dover wrote *Half-Caste* at the age of 33, while striving to promote equality and build 'coloured solidarities' across races and nations. Historian Nico Slate quoted Dover as saying, "Where there is racialism, there can be no peace... (And) without the security of assured peace, sermons on

minished love for trees. Besides joining the Men of the Trees, a

conservation organisation that became the International Tree Foundation, he wrote on forestation measures and the part that trees play in new cities and societies.

Dover had three children with Mervia Heynes-Wood. But in 1934, he effectively abandoned them in Calcutta and set off alone to London. It was here that his explorations of race, colour and identities really deepened. Joining VK Krishna Menon's India League, he lobbied for India's independence and extended the work of New Outlook, a magazine he had founded with Mervia in Calcutta. Their goal was to inspire Eurasians to join the struggle for Indian independence.

Professional Rise

H is first book on the subject of 'mixed races,' *Cimmerii: Or Eurasians and their Future*, was published in 1929, and detailed the 'in-between' position of the Anglo-Indians in British India. Not part of the elite, they were scorned by everyone. Next, in *Kingdoms of the Earth* (1931), he wrote a series of essays decrying blind adherence to religion and cultural stultification.

At age 33, he published *Half-Caste*, his most acclaimed work. Prominent African-American thinkers, including educator Alain Locke, gave the polemical treatise rave reviews. Mulk Raj Anand, a giant of Indian English writing, praised Dover's 'scientific humanism' after reading *Half-Caste*. All this success encouraged Dover to speak more volubly for a 'Congress of Coloured and Colonial People' after the World Peace Congress in Brussels in 1937. He described the new colour movement that has become a realistic issue impressed on us by the similarity of our problems, by the parallel conditions created by imperialism, and economic domination, whether it be in Africa, America, or India or anywhere else.

While his work gathered accolades, his personal life remained unsettled. He married twice again, first to Dorothy, who travelled with him to the United States in the 1930s and 1940s, and then to Maureen Alexander-Sinclair, whose extensive collection of Dover's works is still invaluable for the insight it provides.

In 1938, Dover visited the US, where he met the man who had shaped his political thinking since his young days in Calcutta, the African-American thinker W.E.B. Du Bois. As Nico Slate writes, Du Bois, and other notable figures like Langston Hughes, Claude McKay and Paul Robeson he met in the US, profoundly influenced his beliefs on colour, race, culture and his politics.

In his later books, Dover would urge the mixed races of the world, he gave examples of the Portuguese settlements in Myanmar, Hong Kong, Sri Lanka, and among Australia and New Zealand, to unite against the world's ills. In April 1947, he argued for 'Pan-Asian solidarities' something that would come about at the Bandung Conference of 1955, when newly independent African and Asian nations met in a new era of cooperation.

During World War II, Dover returned to England, where his old calling and experience came in use again. As an entomologist, he wrote the section on biology for a compendium titled *The Complete Self-Educator* (1939). More interestingly, as Wright says, a mosquito repellent cream, that he had discovered in the mid-1920s as a research scientist by the Malaria Bureau of the Malay states, came in handy again. This lotion, called *Dover's Cream*, which had cinnamone oil, cedar wood oil, white petroleum jelly and spirit of camphor, came to the rescue of Allied soldiers, who were fighting in the humid climates of Southeast Asia. Ever a man of many parts, he also worked with George Orwell, Venu Chitale and EM Forster at the BBC as radio broadcasts from London became crucial for boosting the Allied war effort in India.

In 1938, Dover visited the US, where he met the man who had shaped his political thinking since his young days in Calcutta, the African-American thinker W.E.B. Du Bois. As Nico Slate writes, Du Bois, and other notable figures like Langston Hughes, Claude McKay and Paul Robeson he met in the US, profoundly influenced his beliefs on colour, race, culture and his politics.

Multi-coloured Bridal Flower Bun

Choosing a trendy and elegant bridal flower bun for any hairstyle is as important as choosing an outfit for the wedding.

P erfect outfit, jewellery, makeup, and hairstyle are what exactly the bride expects on her wedding day, which she has been planning for a long time. On their wedding day, brides want everything to be perfect because they can't afford to overlook

Scattered Rose Bun

T his creative bridal bun hairstyle with scattered roses will undoubtedly stand out when you want to keep things simple. This will offer you a truly lovely appearance on your wedding day. The yellow roses give a more adorable look to the bride's hair.

Floral Bun for Messy Bun

L ooking for the perfect hair flowers to complement your messy bun? Here's the solution! For a lovely touch to your wedding look, choose pretty baby pink flowers. You can add some beautiful pearls to your hairstyle to make it more interesting.

T his unique bridal bun hairstyle looks just amazing. To enhance the look, add a few roses to the one part of your head. It has the appearance of being both elegant and refined. The hue of the flowers can be customized to complement your wedding lehenga.

I t's challenging to choose a flower bun for a side twisted hairstyle. The floral bun is positioned diagonally, starting from the side front section of your head and ending at the back of your head. This is somewhat unique hair bun design that looks fantastic on the bride.

Semi Floral Bun

I f you have short hair and made a small bun for your wedding, then you should go for semi floral bun, which is designed with baby's breath pretty flowers. These flowers will go well with every colour outfit of your wedding.

Bridal Bun With Gajra

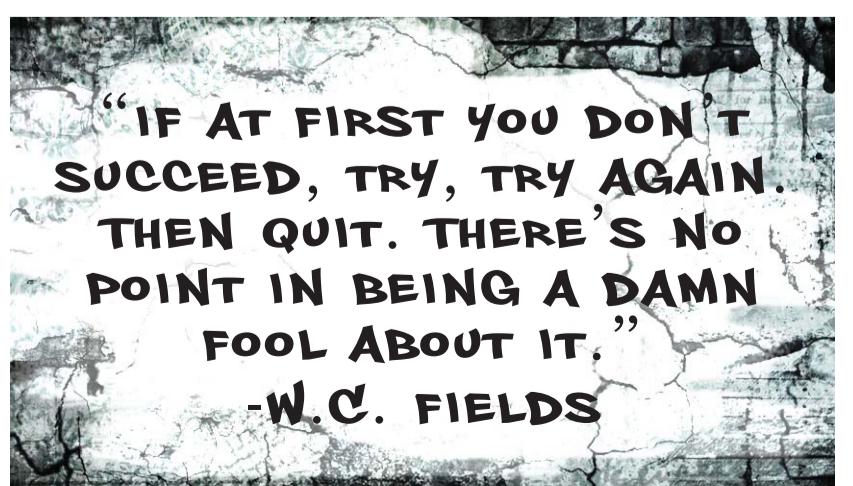

A t weddings, gajras are a popular sight and majority of the women wear them. Gajra adds a more traditional feel to your wedding. Your wedding ensemble will be incomplete without gajra.

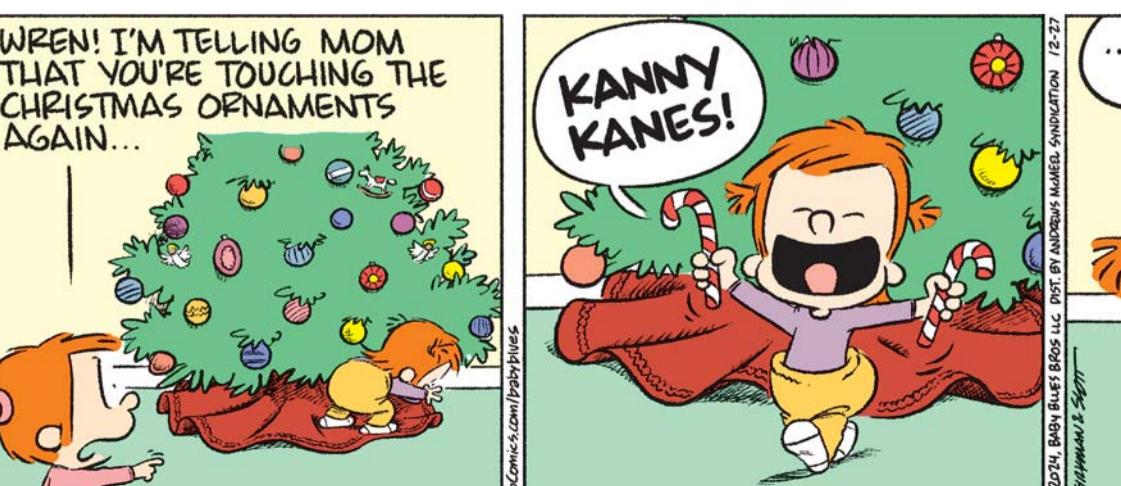

T he most important thing that every bride wishes for her wedding day is a flawless hairstyle. As a result, the wedding bun with rose is ideal for the bride who enjoys being the centre of attention. Every bride can slay at her wedding with this bun adorned with red roses.

मोदी सरकार ने 2047 के विकसित भारत के विजन को साकार करने वाला बजट किया पेश : डॉ. मनसुख मांडविया

केंद्रीय श्रम एवं रोजगार, युवा कार्यक्रम एवं खेल मंत्री मनसुख मांडविया ने भाजपा प्रदेश कार्यालय में प्रेसवार्ता को संबोधित करते हुए कहा कि 2014 में मोदी के नेतृत्व में एक नई कार्यवैयी विकसित हुई है। सरकार द्वारा बनाए जा रहे बजट में दूदोरी से चरखते हुए सर्वस्पृशी, सर्व समावेशी और समग्र विकास को शामिल किया गया। प्रधानमंत्री नेंद्र मोदी ने पिछले दस सालों में देश को एक नई दिशा देने का कार्य किया है। आजीवा के 75 वर्ष पूर्ण होने पर प्रधानमंत्री नेंद्र मोदी को अत्यन्त महोत्सव काल के दौरान 2047 तक विकसित भारत का सपना देखे के सामने रखा और उस सपने को साकार करने की दिशा में रोडमैप भी तैयार कर देश की 140 करोड़ जनता के सामने रखा। केंद्र सरकार की ओर से तैयार किए जा रहे बजट में विकसित भारत के सामने को गति रोडमैप की कार्यशैली देखें।

मांडविया ने कहा कि 1985 में राजीव गांधी ने 21वीं सदी की बात कही थी, लेकिन बिना कार्य योजना या फिर रोडमैप के उकान सपना सपना ही रह गया। वहीं दूसरी ओर प्रधानमंत्री नेंद्र मोदी ने 2014 में लाल किले से देश के सामने विकसित भारत के सामने को गति रोडमैप की कार्यशैली देखें।

मनसुख मांडविया ने कहा कि आज देश में रोजगार बढ़ा है। युवाओं मात्र 4 करोड़ लोगों को रोजगार दिए गए हैं जबकि वर्ष 2014 से 2024 तक 17 करोड़ नए रोजगार निर्माण कर लोगों को नौकरी दी गई है। एक दशक में 8 करोड़ लोग इंसीफेफोन में रजिस्टर्ड कार्यकाल में पहले बैंगोगारी 6 प्रतिशत थी, जबकि आज देश में बैरोजगारी की दर 3.2 प्रतिशत रह गई है। इसी तर्ज पर व्यापारी व्यापारी को पांच संकल्प लेने चाहते हैं। वहीं युवा लोगों के बैरोजगारी का लाभ करने विवाह से प्रेरणा लेने, देश के प्रत्येक नागरिक के साथ कदम से कदम मिलाकर आगे बढ़ने, सामाजिक-आर्थिक सुरक्षा का माहौल देने और ऐसे प्रथम को भावना से कार्य करने के लिए प्रेरित किया।

जयपुर में एंटरप्रेन्योर राउंडटेबल 2025 का सफल आयोजन

जयपुर इंडियन चैरर ऑफ कॉर्पस और टाई राजस्थान के संयुक्त तत्वावादन में “एंटरप्रेन्योर राउंडटेबल 2025” का आयोजन अईटीसी राजपुताना, जयपुर में सफल हुआ। इस आयोजन में तकनीकी नवाचार, आर्टिफिशियल इंटेलिजेंस और पारिंगिक उद्योगों में डिजिटलोगिक के प्रभाव पर गहन चर्चा की गई। कार्यक्रम के मुख्य वक्ताओं में अमूल डेवरी के प्रबंधन निरेक, अमित व्यान और मेटा के ग्लोबल बिजनेस हेड, विकास

कार्यक्रम में अमूल डेवरी के एम.डी.अमित व्यान, आई.सी.राजस्थान की अध्यक्ष जयवीष पैरेवाल और मेटा के ग्लोबल बिजनेस हेड विकास पुरोहित शामिल हुए।

पीएलआई (प्रोडक्शन लिंकड और भविष्य की कंप्यूटिंग) विषय पर इस्टेटिव स्ट्रीम का लाभ उत्तरकर प्रकाश डालते हुए बताया कि किस अमूल हेल्पर और हाई-प्रोटीन ब्रेक प्रकार आर्टिफिशियल इंटेलिजेंस और प्रोडक्ट को नई रेज भी विकसित करने उभयों हुई तकनीकों के माध्यम से व्यवसायों को नई ऊँचाईयों तक पुर्हावा जाएगा। विकास के लिए एक नेतृत्व दिए गए व्यवसायों को चर्चे तथा दबावियां वितरित की जाएंगी। विकास का उद्घाटन सर्वस्पृशी विकास का सुनिश्चित करने वाला है। इतना ही नहीं, जी के नेतृत्व में 10 साल में देश बदला जाएगा। विकास के सामने एक निमित्त ही रहा है।

विकास पुरोहित ने “एआई क्रांति

पीएलआई के लिए एक निमित्त ही रहा है।
